

- Step 2:** Fill in your License key that was supposed to be shared with you in advance as well as the settings for accessing your mail server, which will be used to send notifications from Acura and generate periodic reports.

Note: SMTP server with TLS/SSL encryption is required to proceed with deployment.

If you prefer a public SMTP server associated with your email address (gmail, yahoo etc.), please find its settings online. In case of a private SMTP server, contact your network administrator for further details.

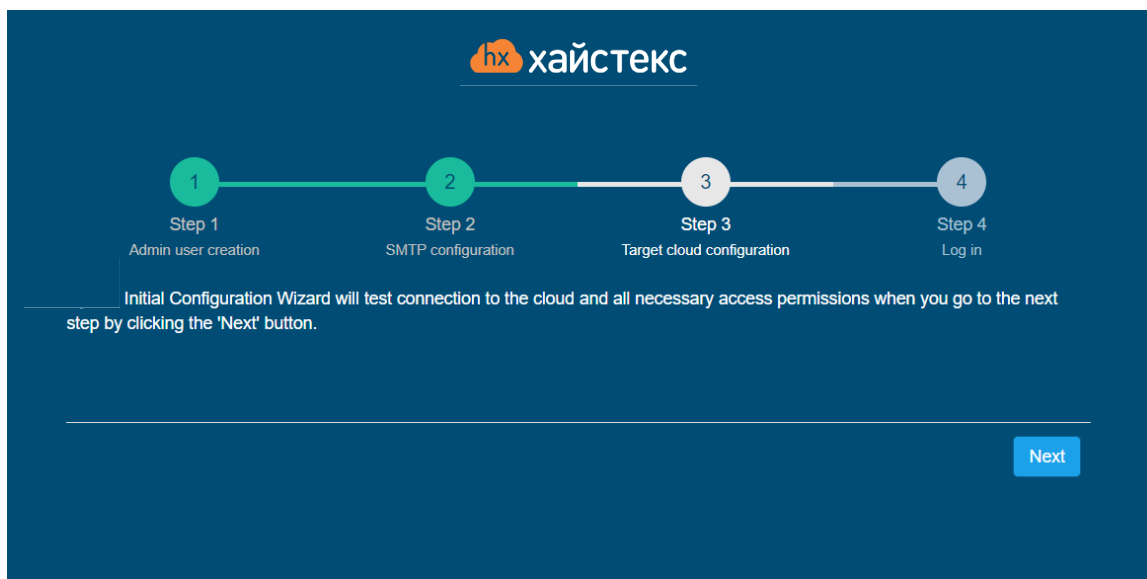

A sample notification will be sent to the specified “Test email” to verify the functionality when you click “Next”.

The screenshot shows the configuration interface for Step 2: SMTP configuration. At the top, the logo "hx хайстекс" is displayed. Below it, a progress bar indicates four steps: Step 1 (Admin user creation), Step 2 (SMTP configuration), Step 3 (Target cloud configuration), and Step 4 (Log in). Step 2 is currently active. A text box explains: "In order to be able to send email notifications, a mail server configuration must be introduced during initial configuration of Acura. Please enter valid SMTP settings as well as the provided license key." Below this, there are seven input fields, each with a question mark icon to its right:

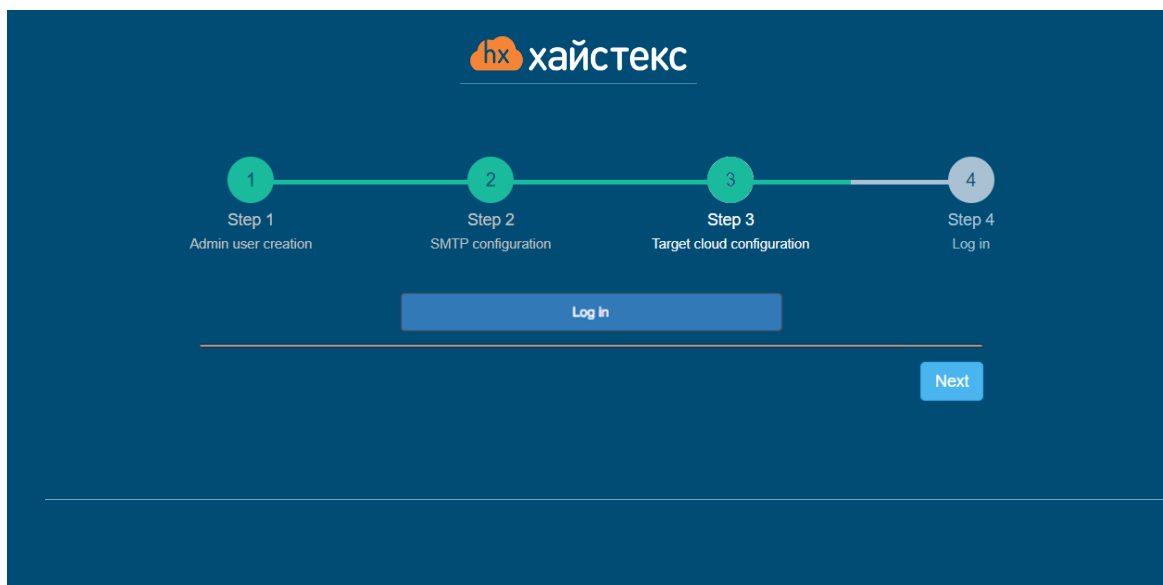

- License key*
- Encryption type* (with a dropdown menu showing "SSL")
- SMTP server*
- SMTP port*
- SMTP username*
- SMTP password*
- Test email*

A "Next" button is located at the bottom right of the form.

5. **Step 3:** Click the “Next” button.

6. **Step 4:** Installation is complete, and you can now log in to the system using credentials entered in the previous step.

Troubleshooting

Acura automatically checks cloud access and necessary permissions for assuring successful operation. It provides detailed error messages that describe their potential causes. In case of an error, please check the correctness of data entered and availability of the necessary permissions.
